Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, drawn to haloalkyl carboxamide derivatives, method of using and method of making, when A is (A1) and M is phenyl.

Group II, claim(s) 1-7, drawn to haloalkyl carboxamide derivatives, method of using and method of making, when A is (A2 or A3) and M is phenyl.

Group III, claim(s) 1-7, drawn to haloalkyl carboxamide derivatives, method of using and method of making, when A is (A4) and M is phenyl.

Group IV, claim(s) 1-7, drawn to haloalkyl carboxamide derivatives, method of using and method of making, when A is (A5 or A17) and M is phenyl.

Group V, claim(s) 1-7, drawn to haloalkyl carboxamide derivatives, method of using and method of making, when A is (A6) and M is phenyl.

Group VI, claim(s) 1-7, drawn to haloalkyl carboxamide derivatives, method of using and method of making, when A is (A7 or A8) and M is phenyl.

Group VII, claim(s) 1-7, drawn to haloalkyl carboxamide derivatives, method of using and method of making, when A is (A9 or A10 or A15) and M is phenyl.

Group VIII, claim(s) 1-7, drawn to haloalkyl carboxamide derivatives, method of using and method of making, when A is (A11 or A12) and M is phenyl.

Group IX, claim(s) 1-7, drawn to haloalkyl carboxamide derivatives, method of using and method of making, when A is (A13) and M is phenyl.

Group X, claim(s) 1-7, drawn to haloalkyl carboxamide derivatives, method of using and method of making, when A is (A14) and M is phenyl.

Group XI, claim(s) 1-7, drawn to haloalkyl carboxamide derivatives, method of using and method of making, when A is (A16).

Group XII, claim(s) 1-7, drawn to haloalkyl carboxamide derivatives, method of using and method of making, when A is (A18) and M is phenyl.

Group XIII, claim(s) 1-7, drawn to haloalkyl carboxamide derivatives, method of using and method of making, when A is (A19) and M is phenyl.

Group IVX, claim(s) 1-7, drawn to haloalkyl carboxamide derivatives, method of using and method of making, when A is one of (A1 to A19) and M is other than phenyl.

Group VX, claim(s) 8, drawn to aniline derivative.

The inventions listed as Groups I-VX do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: They are structurally divergent and chemically disparate groups depending on the definitions of A and M, and thus lacking the same or corresponding technical feature.

In view of the complex nature of the restriction requirement, a written restriction requirement has been made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to SHAILENDRA KUMAR whose telephone number is (571)272-0640. The examiner can normally be reached on M-F, 7:30AM-5:00PM, alternate Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Daniel Sullivan can be reached on 571-272-0779. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
